COMMUNIQUÉ
to the scientific community

Pre-announcement – Pfizer-FRQS-MSSS Chronic Disease Fund: launch of the second edition of the competition

The Fonds de recherche du Québec – Santé (FRQS) is pleased to announce to the scientific community that the second edition of the Pfizer-FRQS-MSSS Chronic Disease Fund competition will be launched in September 2011.

As in the previous competition, projects must be presented by a health and social services centre (centre de santé et de services sociaux - CSSS) in collaboration with family physicians and researchers in the health and social services sector. Letters of intent must be submitted to the health and social services agency (agence de la santé et des services sociaux - ASSS) to which the CSSS reports. The program aims to assess chronic disease prevention and management initiatives by supporting and fostering their implementation across Québec.

Competition details will be announced in September 2011 on the Web site of the Fonds de recherche du Québec – Santé. The letters of intent must be submitted in December 2011 to an ASSS.

Further information will be available in an upcoming announcement and on our Web site.
